

YOU CAN SUPPORT THE VITAL WORK OF YOUR SOUTH BEND COMMUNITY SCHOOLS

There is nothing more important than providing a quality public education to our children. Whether you currently have children in public schools, have family members who are alumni of South Bend public schools, or simply agree that public schools are an important pillar of our fabric as a community, you can help make our educational offerings better.

South Bend public schools partner with the South Bend Education Foundation, whose mission is to promote, advocate and fund programs that enrich the educational experiences of students and staff in our schools.

The Foundation helps bridge the funding gap between that which the State of Indiana provides, and the demand for high-quality, innovative programs. Because the Foundation is a 501 (c)3, your investment in our public schools is also tax deductible (consult your financial adviser).

Every dollar you invest will make a great difference in the lives of our students and help them reach their full potential.

Many of the opportunities listed offer the ability to have particular programs named in your honor, or named in honor of persons who have made significant programmatic contributions to the success of our students over the years.

Please review the list of naming opportunities and thoughtfully consider becoming a benefactor of South Bend public schools and the South Bend Education Foundation.

If a particular opportunity piques your interest, we would love to provide you with additional information, and arrange an in-person meeting with Dr. C. Todd Cummings, our Superintendent or Dean Moore, Executive Director of the South Bend Education Foundation.
